

# CASE

Case addresses the entire scope of today's construction industry with a full line of construction equipment. All Case equipment is developed using state-of-the-art engineering and manufacturing - we ensure that quality, value and performance are built into every machine. From skid steers and backhoes to large wheel loaders and excavators, Case has an equipment solution for you.

## ARTICULATED DUMP TRUCKS

Case makes an important expansion of its construction equipment line with the new 300 Series articulated off-road trucks, featuring superior ride, high load capacity and all-around visibility built on a rugged chassis with field-proven components. The Case 325 and Case 330 articulated trucks offer an outstanding ride even in extreme conditions, clear sight lines and excellent maintainability, Case articulated trucks will deliver top productivity and total ownership value.

## COMPACTION EQUIPMENT

The new Case 200 Series compaction rollers combine ease of use, outstanding visibility and climbing ability to create optimum compactive forces. With Cummins engine power from 100 to 148 hp (75 to 110 kW), the SV208, SV210, SV212 and SV216 offer an operator station cushioned from noise and vibration. With available padfoot and smooth-drum configurations, Case rollers can handle a wide variety of soil and material conditions.

## CRAWLER DOZERS

Case crawler dozers are built with the power for tough conditions and the precision for finish work - these machines set the standard for ease of operation and operator comfort. With a variety of models to choose from, Case crawlers offer durable performance day after day.

## EXCAVATORS - TRACKED

Customer-driven features make Case excavators perfect for your demanding job environments. Case offers a large selection of excavators for you to choose from, including standard models, as well as long reach models, narrow models, forestry models and many other special application models. These machines feature quick cycle times, powerful lift and breakout force, and precision control for maximum productivity.

## FORKLIFTS

Case vertical mast forklifts are rugged and durable. These machines are ideal for your lift and carry and material handling jobs. With exceptional versatility and heavy-duty design, Case forklifts can handle your tough tasks. The Case G series (585G, 586G and 588G) is a reliable, durable and comfortable serie of forklifts that can meet the demands of any material handling job. ; All Case Series forklifts are industry leaders when it comes to low ownership costs.

## HORIZONTAL DIRECTIONAL DRILLS

The Case line of directional drills is designed to handle just about any underground project. These highly-specialized machines can help you perform at your best in a variety of utility and underground applications. Models: 300CM, 6010 and 6030.

## LOADERS / BACKHOES

Case loader/backhoes lead the industry with new levels of performance. Case backhoes feature quick response, quiet comfort, superior productivity and lasting durability. A variety of models are available with varying dig depths and lift capacities. These machines will take you to new levels of productivity and profitability in any application.

## LOADER / TOOL CARRIERS

When you need one machine to handle many tasks on the work site, the new Case 570M XT Loader/Tool Carrier stands in a class by itself. Case reasserts its industry leadership with the 570M XT and 570M XT Turbo. With more lift, better breakout force and a range of attachments for the loader and three-point hitch, the 570M XT sets a new benchmark for performance.

## SKID STEERS LOADERS

The toughest jobs and most extreme conditions demand equipment that can do it all - faster and smarter. Case XTreme Machines feature seven new XT skid steers with the power, lift, maneuverability and attachments to comfortably tame any job site. Not just any line of skid steers can handle such a range of work, from finessing through a narrow gate with a load of sod to hauling a 3,000-pound load of crushed rock. You want results and Case XT skid steers provide eXTreme solutions for your eXTreme challenges.

## TELESCOPIC HANDLERS

The Case line of telescopic handlers can lift and carry heavy loads for your most demanding jobs. With a selection of models, Case telescopic handlers are an ideal addition to your equipment fleet. Models: 686G, 686GXR and 688G.

## TRENCHERS

Your tough underground conditions require a top-quality trencher. Case offers a wide variety of trenchers for even your toughest job conditions. The Case line of trenchers are built with years of design engineering and testing experience - these machines withstand hard work day after day.

## WHEEL LOADER TOOL CARRIERS

The Case family of wheel loaders have a tradition of durability and reliability to get the job done on time, every time. Rugged construction and customer-driven features make Case wheel loaders your product of choice. These machines will meet and exceed your expectations. Case offers several models to meet your specific job requirements.
